HP2 Sport

HIGH PERFORMANCE

HP2 SPORT

Track-ready performance.
- Motorcyclist

The new HP2 Sport earned 5th place first time out at the prestigious Daytona 200 road race, beating many others boasting higher hp and lower weights. Your first ride on the lightest, most powerful Boxer engine race bike ever built will tell you why. The HP2 Sport's new cylinder heads with overhead cams provide monster torque for eye-opening acceleration, its low center of gravity aids agility and the unique Telelever front / Paralever rear suspension with Ohlins shocks enhances control while braking. Included MotoGP extras like the shift assistant for clutchless upshifts, race-ready 2D dash and ultra-light forged wheels helped the HP2 Sport school the competition during recent endurance racing in Europe and the U.S. You can even add switchable ABS for the street ride to and from the track!
